

Bouffant Cap

A puffy-shaped head cover, this cap is essential personal protective equipment (PPE) designed to prevent stray hair and particles from contaminating work areas. It is made from lightweight and highly breathable Non-Woven Polypropylene (PP) fabric, which ensures comfort and dryness during use. The cap is secured around the head by a soft, flexible elastic band, providing a comfortable, one-size-fits-most solution that accommodates various hairstyles. This economical cap is disposable and serves a critical function in maintaining hygiene standards across a range of hygiene-sensitive industries.

- † Features a puffy, round shape that fully conceals all hair types and lengths.
- † Made from lightweight, non-woven fabric (PP Spun Bond) for optimal breathability and comfort.
- † Includes a soft, elasticated fit to ensure a secure seal around the head without irritation.
- † Provides excellent barrier protection against the escape of hair, dandruff, and microorganisms.
- † Is a single-use disposable item, ideal for strict hygiene compliance and preventing cross-contamination.
