

Clean pro N95 mask

This is a high-efficiency respiratory protective device designed to offer superior defense against environmental hazards. Certified to both N95 (US standard) and FFP2 (European standard), this mask provides 95% particulate filtration, effectively keeping out viruses, bacteria and air pollution. Its construction features 5 Layers Filtration, utilizing quality non-woven and melt-blown fabrics for maximum security and breathability. The mask is engineered with a 3D design to form a close facial fit, creating a strong seal necessary for high-efficiency personal protection.

- Provides High Protection against harmful pathogens, irritants, dust, allergies and pollen.
- Achieves High Efficiency through a 3D design that forms a strong seal around the nose and mouth.
- Includes 5 Layers Filtration technology to ensure a multi-level barrier against fine particles.
- Offers High Comfort with breathable fabric, flexible ear loops and an easy-fit nose clip.
- Certified to N95 and FFP2 filtration standards for guaranteed quality assurance..

Product Specification

Category	Specification
Product Type	Protective Mask / Filtering Facepiece Respirator (FFR)
Filtration Standard	N95
Filtration Efficiency (PFE)	>95% Particulate Filtration
Layers	5 Layers Filtration
Material	Non-Woven and Melt-Blown Fabric
Design Feature	3D Design for Close Facial Fit
Comfort Feature	Flexible Ear Loops and Easy-Fit Nose Clip
Usage	Disposable (Typically)
Certifications	CE, ISO, FDA
