

## KingFa KN95 Face Mask

KN95 Face Mask is designed with 5 layers of protection, it is intended to be worn for daily use and to minimize inhalation exposure to certain airborne biological particles. The ergonomic, foldable design features a precise fit and is composed of high-quality non-woven and melt-blown fabrics. It is a single-use, non-sterile product that provides a reliable barrier against non-oily particulates like dust, pollen and aerosols.

- Features 5 layers of material to filter at least 95% of non-oily particles.
- Includes an adjustable nose bridge clip to provide a secure facial fit and minimize leakage.
- Made with skin friendly, odorless and latex-free materials for user comfort.
- Has a thin, light, multi-layer design which helps in reducing respiratory resistance.

### Product Specification

Category	Specification
Type	Particle Filtering Half Mask / Respirator
Filtration Standard	KN95 (GB 2626-2006)
Protection Layers	5 Layers (2 Non-woven, 2 Melt-blown, 1 Non-woven middle)
PFE (Particulate Filtration Efficiency)	95%
Strap Attachment	Elastic Ear Loops
Powdering	Powder-Free (Implied by components)
Sterility	Non-Sterile, Disposable
Shelf Life	2 -3 years
