

Personal Protective Equipment (PPE) Kit

This comprehensive kit provides the essential components for a complete head-to-toe barrier against infectious agents, minimizing the transfer of contaminants in clinical or environmental settings. It typically includes a full-body coverall/gown with an attached hood, protective face mask (3-ply), hand gloves, shoe covers and a disposal bag. Designed to be disposable and lightweight, the kit ensures the security and hygiene of the wearer against blood, body fluids and respiratory secretions.

- Provides full body protection via a coverall/suit with an integrated cap/hood.
- Includes a 3-Ply Face Mask for barrier protection against large respiratory droplets.
- Comes with Hand Gloves and Shoe Covers for complete coverage of extremities.
- The entire kit is designed to be disposable to minimize cross-contamination risks.
- Includes a Biohazard Disposal Bag for safe and hygienic removal and disposal of contaminated gear.
