

Surgeon Cap

A classic-style head cover worn by medical professionals, this cap provides a necessary hygienic barrier in sterile or patient care environments. The cap's design is form-fitting and features adjustable ties at the rear, ensuring a snug and customized fit for most head sizes. It is made from non-woven polypropylene that is lightweight and air permeable to maintain wearer comfort and body temperature during long procedures. The cap's primary function is to contain hair and scalp particles, thereby minimizing the risk of microbial contamination in the workplace.

- Features an adjustable tie-back closure for easy positioning and a secure, personalized fit.
- Designed to contain all hair completely, preventing contamination of the sterile field.
- Made from lightweight, breathable fabric (e.g., non-woven or cotton) for cool and comfortable wear.
- Effectively minimizes the transfer of microorganisms from the wearer's hair and scalp.
- Available in a unisex, one-size-fits-most design with different tie styles for various user preferences.
