

Surgicare Gloves

These gloves are premium, sterile surgical gloves designed to deliver dependable safety and performance in the operating room. Classified as Safe, Pinhole-Free and Non-Irritant Gloves, they form a crucial barrier against cross-contamination and infection. The gloves are manufactured from high-quality material (implied to be latex by the IS 13422 standard shown) and are sterilized for immediate use in all critical surgical and clinical procedures. Their design is anatomically shaped to ensure a superior fit, enhanced comfort, and maximum protection for medical professionals.

- Provides high tensile strength and excellent elongation properties.
- Sterile and non-irritant design, essential for maintaining hygiene in surgical settings.
- Features an anatomically shaped design for superior comfort and a fit that reduces hand fatigue.
- The glove surface is textured or roughened for an excellent instrument grip and secure handling.

Product Specification

Category	Specification
Product Type	EN14683:2019+AC:2019
Sterility	Sterile
Safety Features	Pinhole Free, Non-Irritant
Material	Latex
Design	Anatomically Shaped
Grip	Textured/Roughened Surface for Excellent Instrument Grip
International Standards	Meets / Exceeds international standards, including ASTM D-3577, EN455, and ISO 10282
Indian Standard	IS 13422
