

Te 3 ply mask

This is a standard Te 3-Ply Mask designed to create a physical barrier, minimizing the projection and transmission of large droplets and respiratory secretions. It features a multi-layered construction, utilizing non-woven fabric for comfort and a central melt-blown layer for filtration. Lightweight and comfortable, the mask is secured by elastic ear loops and includes an adjustable nose clip for a snugger fit over the nose. This cost-effective solution is medically approved and ideal for general public use, healthcare, food preparation, and other environments requiring basic infection control.

- Features three protective layers (outer hydrophobic, middle filter, inner hydrophilic) for effective barrier function.
- Provides >95% Bacteria Filtration Efficiency (BFE), making it suitable for medical and general use.
- Includes a soft, adjustable nose bar for an optimum fit and to help reduce air leakage.
- Made from lightweight, breathable non-woven fabric to ensure high comfort during extended wear.
- Is a single-use disposable mask that promotes hygiene and prevents cross-contamination.

Product Specification

Category	Specification
Product Type	Surgical / Procedural Mask
Filter Class	N95
Layers	3-Ply (Triple Layer)
Key Materials	Polypropylene, Non-Woven Fabric, Melt-Blown Filter
Bacterial Filtration Efficiency (BFE)	>95%
Fit Method	Elastic Ear Loops
Nose Piece	Built-in Adjustable Nose Clip
Usage	Disposable, Single-Use
