

## Venus N95 Mask

This is a NIOSH-approved N95 particulate respirator designed to provide superior protection against respirable suspended particulate matter, dust, mist, and airborne biological particulates like viruses. It features superior micro-fine filter media technology and a multi-layered composite construction, ensuring effective filtration down to 0.3 micron. The inclusion of an exhalation valve helps to release warm, exhaled air, which effectively removes heat buildup and promotes easier breathing during long hours of wear. This comfortable, single-use respirator is ideal for use in healthcare, laboratory, pharmaceutical and various industrial settings where solid and non-volatile liquid particles are present.

- Is a NIOSH-approved N95 respirator, filtering >95% of non-oil-based particles.
- Features an exhalation valve that effectively removes heat and moisture for enhanced breathing comfort.
- Includes a latex-free knitted elastic strap which has a long life and remains skin-friendly.
- The mask has an embedded nose clip that is leak-proof and contains no metal exposure or loose parts.
- Equipped with unique fit adjusters to provide an optimum fit and comfort for a secure seal.

### Product Specification

Category	Specification
Model	V-4400 Series Respirator
Protection Class	EN 149:2001+A1:2009 & ISI 9473
Filtration	Superior Micro Fine Filter Media Technology
Materials	Electrostatic PP-MB Filter, Aluminum Nose Clip
Straps	Latex-Free Knitted Textile Elastic
Exhalation	Includes Valve (indicated by image and typical model specifications)
Use	Single Use (Disposable)
Shelf Life	5 years from date of manufacture
